DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1, the claim language "may be" under notation "m" is not a positive citation.

In Claim 1, last line, the word -- single -- should be inserted before "chemical bond" to clarify the claim language.

In Claim 2, the claim language "may be" under notation "r" is not a positive citation.

In Claims 4 and 19, the definition for "T" is vague because the first group is saturated cyclohexane, which the T is defined as unsaturated carbocyclic ring.

In Claims 5 and 20, the claim language "may be" under notation "Y⁴" is not a positive citation.

Claims 3 and 6-18 are rejected because they are dependent claims.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest references (DE 19640618, DE 19628700 and EP 630892) differ from the present invention in that the present invention has a novel structure represented by formula (I). The present chiral compound has two mesogenic cores linking to ring by ortho instead of para-position. Also, see the method of preparing the present compound, which is different from the cited references.

Art Unit: 1756

3. The reference (CA 1969: 524819) differs from the present compound in that the present compound has a spacer (A¹) group.
